

Upcoming Workshop by Southwest & Rockies PTTC

Internet Data Resources: NM, CO, UT

September 9, 2004, 9 am – 5 pm, \$50 (includes lunch)

San Juan College, Farmington, NM

A unique opportunity to learn how to utilize the FREE data resources from the experts at the New Mexico, Colorado, and Utah state agencies. Hands-on, interactive exercises in data query, downloading, links, more.

NEW MEXICO

Martha Cather, Industry Technology Coordinator for the New Mexico Petroleum Recovery Research Center (PRRC) (<http://octane.nmt.edu>) will take workshop participants through a tour of several web sites that provide New Mexico petroleum data. The presentation will include a discussion of information available on GO-TECH, New Mexico Oil Conservation Division (NM OCD), and New Mexico State Land Office (NM SLO) web sites, and how to get the most out of data queries and resources available on each of these web sites. A representative from the NM OCD will be on hand to cover the OCD's web site in more detail. Martha will also discuss the NM Well Location CD. Copies of this CD as well as a new edition of the manual, *Electronic Resources for New Mexico* will be available that covers the latest changes to the Southwest PTTC's web sites.

COLORADO

Thom Kerr, a computer information specialist with the Colorado Oil and Gas Conservation Commission (COGCC, <http://oil-gas.state.co.us>) will present their interactive map application as well as the well database and log image collection. Instruction will be given on how to query well, production, and operator information coupled with use of the mapping tools to display the information. Additional website resources include a library of commission studies, reports and statistical downloads, hearing information, rules and regulations, spacing orders, searchable permit activity, and downloadable forms.

UTAH

John Baza, Assistant Director for the Utah Division of Oil, Gas, and Mining (DOGM, <http://dogm.nr.state.ut.us/oilgas/>) will walk participants through the various features of the website. Interactive exercises will allow participants to directly query the information databases and access multiple links from the website. The session will cover the following major topics: introduction website (navigation and features,) state government links, quick reference links, menu bar items, and well data search. The DOGM web page is a dynamic tool that is updated and changed on a regular basis. Changes are made to better serve the oil and gas industry, public, and other government agencies.
